

Pol potential epitope coverage

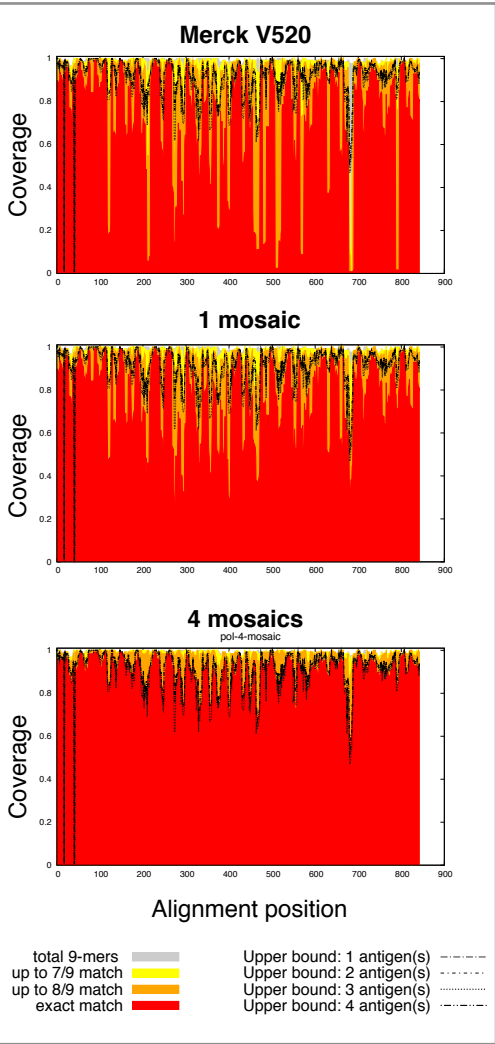

a. Epicover output (per sequence)

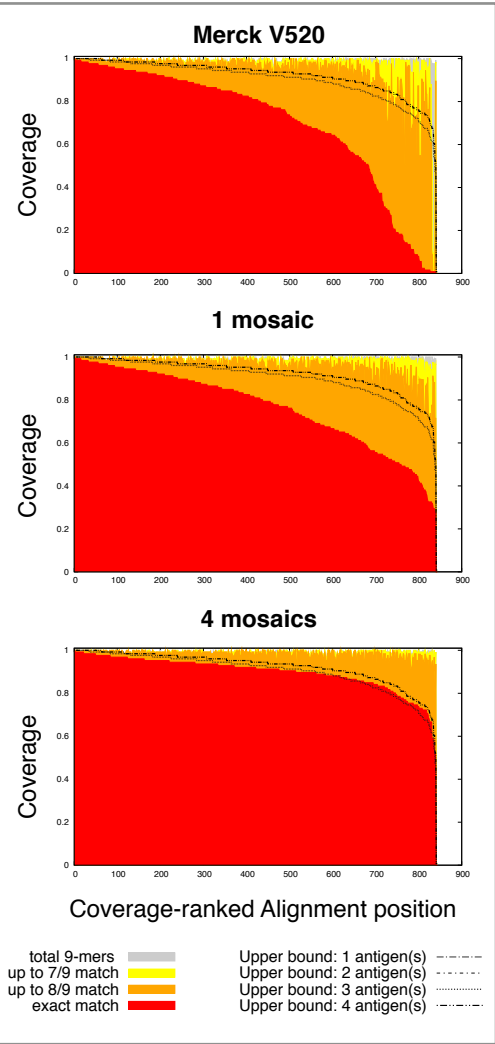

b. Posicover output (Rank-ordered Matched/Missed 9-mers)

c. 9-mer coverage by position

d. Ranked 9-mer coverage

e. Coverage mapped on alignment

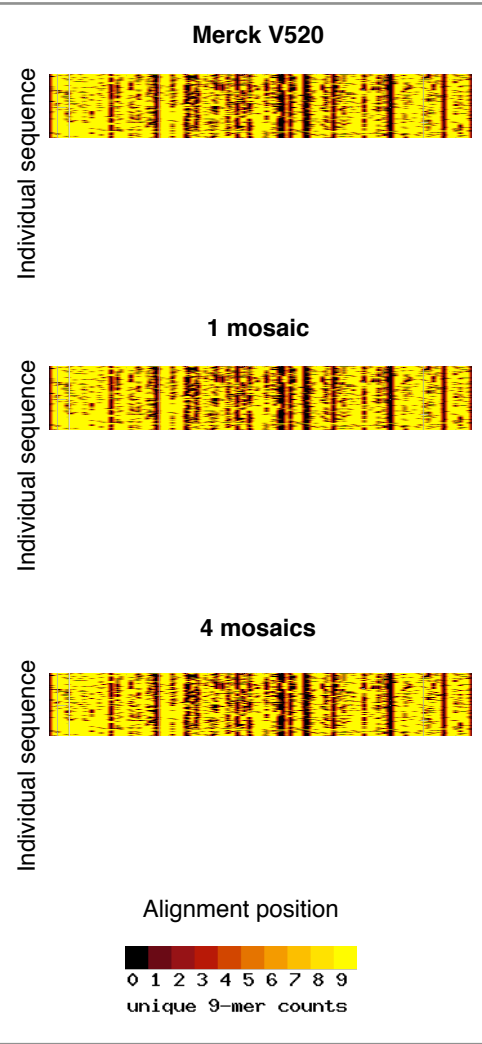

Figure S2. Pol potential epitope coverage. Mosaic data sets with 1-4 antigens were generated as in Fischer et al. (2007) Nature Medicine 13:100-106; Merck V520 vaccine trial antigen sequences were kindly provided by Andrew Betts.
